Reducing Operational Risks

Asset and Repair Management

Problem:

- °Lost assets reduce productivity and revenue.
- °Poor scheduling affects maintenance quality.
- °Unauthorized access and movement.

Solution

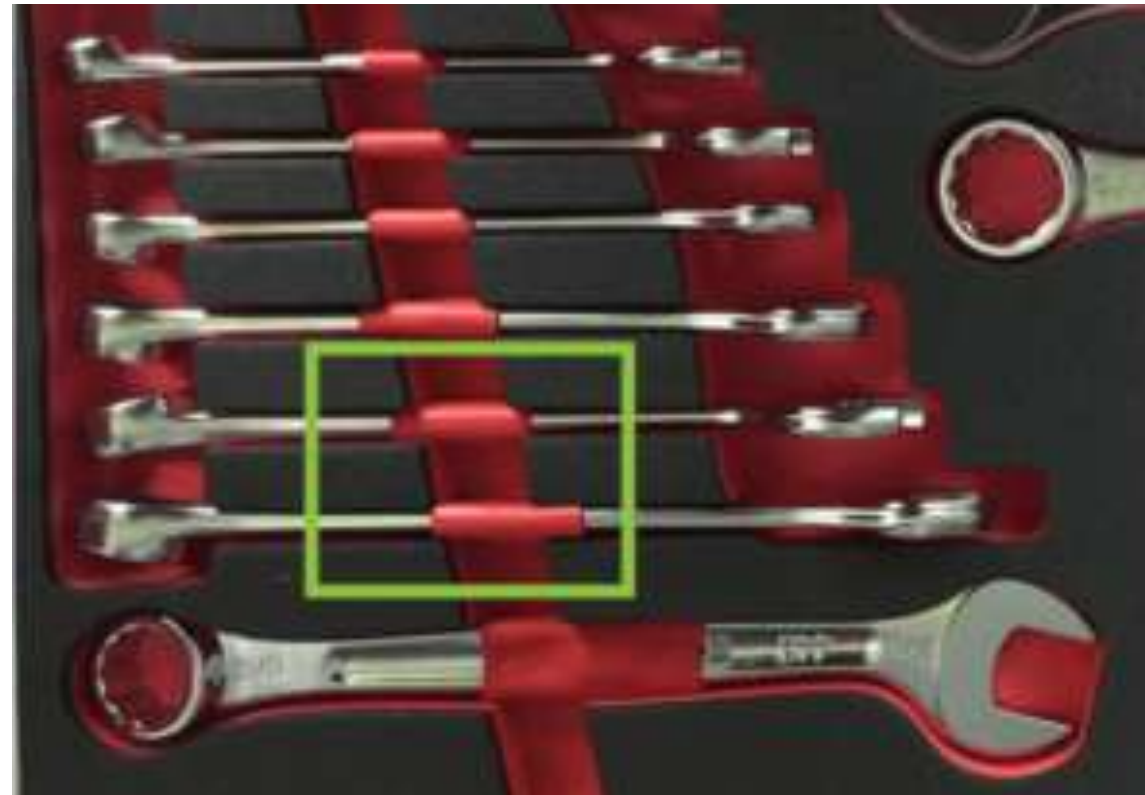

- ° Real-Time Tracking: Digital tags locate equipment and monitor status.
- ° Efficiency: Automates tracking to save time and boost productivity.
- ° Better Maintenance: Enhances scheduling with data insights.

Asset Tag Use Cases

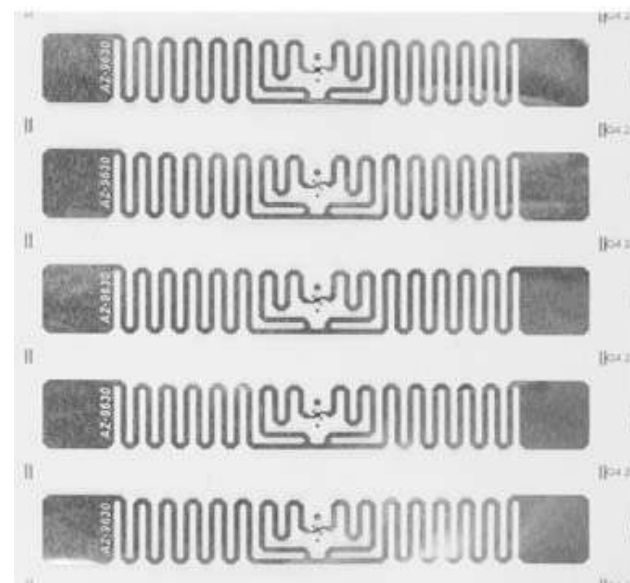

Micro tags for tools & equipment

Moving vehicle and custom solutions

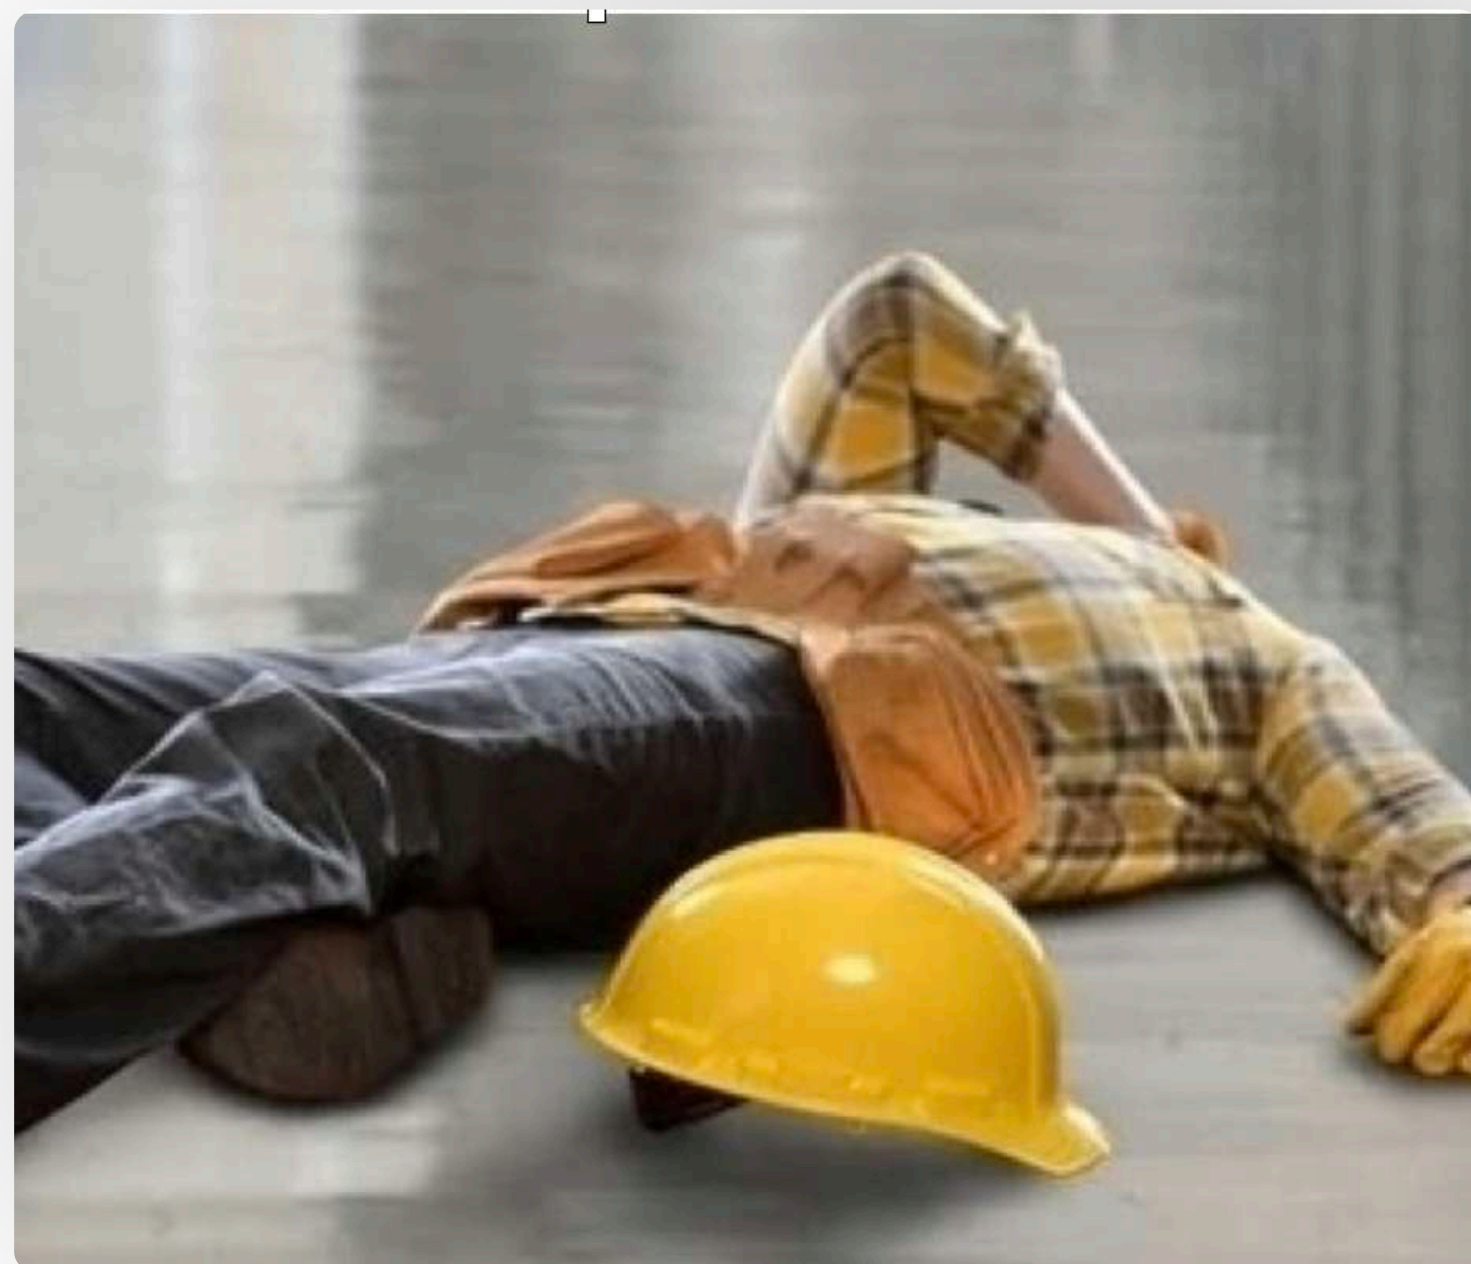

Paper/Metals/Plastics

HSE: Man Down/Lone Worker Detection

Problem

Critical Delay:

°Difficulty locating and assessing individuals during emergencies can waste valuable response time.

Solution

Proactive Alerts:

°Wearable sensors monitor health and signal issues before or after collapse.
°Rapid Response: Identifies nearby personnel with first responder capabilities.

Why Kiana?

Rapid Time
